EDUCATION

PDP ACADEMY

Java Backend Development, 2023 jan - feb 2024

EXPERIENCE

Backend Developer | Asaxiy LLC

Nov 2023 – Dec 2023

PROJECTS

[Booking.com](#) Clone(Spring Boot, Spring MVC, Thymeleaf)

- Implemented the project using Spring for building a scalable and maintainable web application, allowing for efficient request handling and server-side rendering.
- Utilized Spring Data JPA to integrate a powerful and streamlined data access layer, enhancing database operations and ensuring optimal data persistence.
- Employed Thymeleaf as the templating engine, enabling the creation of dynamic and responsive user interfaces with seamless integration of server-side data.
- Collaborated with cross-functional teams to design, facilitating smooth communication between frontend and backend components.

[Reminder-bot](#)

- Engineered an asynchronous processing system to handle concurrent reminder requests, ensuring scalability and responsiveness.
- While doing this project I learned how to send http requests.

[1fit-clone](#) (Spring Boot, JWT token, Redis)

- Implemented user authentication and authorization using JWT tokens to ensure secure access.
- Integrated Redis for caching to optimize performance and enhance the overall responsiveness of the application.
- Designed and implemented database schema for storing user profiles, fitness activities, and related data in PostgreSQL.

VOLUNTEERING

Backend Developer | PDP Talent

Feb 2024 – Present

Technologies and Languages

- Java, OOP, Servlet JSP, Spring MVC, Spring Boot, Spring Data JPA, Hibernate, HTML, CSS, Microservices, Message Broker (RabbitMQ)
- Git, GitHub, PostgreSQL, MongoDB, Redis, Docker, AWS
